DETAILED ACTION

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-3 is rejected under 35 U.S.C. 103(a) as being unpatentable over JP 64-81874 in view of Reisser et al (USPN 5332767) as set forth in the Office action mailed 4/14/04.
3. Claim 4 is rejected under 35 U.S.C. 103(a) as being unpatentable over JP 64-81874 in view of Reisser et al (USPN 5332767) as set forth in the Office action mailed 4/14/04.
4. Applicant's arguments filed 7/14/04 have been fully considered but they are not persuasive. Applicant argues that there is no teaching in either reference to combine the references. Applicant is reminded that obviousness can only be established by combining or modifying the teachings of the prior art to produce the claimed invention where there is some teaching, suggestion, or motivation to do so found either in the references themselves or in the knowledge generally available to one of ordinary skill in the art. See *In re Fine*, 837 F.2d 1071, 5 USPQ2d 1596 (Fed. Cir. 1988) and *In re Jones*, 958 F.2d 347, 21 USPQ2d 1941 (Fed. Cir. 1992). In this case, the combination of JP '874 and Reisser et al is motivated by consumer's desire to have inks of different looks or appearances, which is well-known in the knowledge generally available to one

Art Unit: 1732

of ordinary skill in the ink art. Inks having different looks or appearances are common in the ink market.

Applicant argues that applicant's purpose for the invention is different from the purposes of JP '874 and Reisser et al. The fact that applicant has recognized another advantage which would flow naturally from following the suggestion of the prior art cannot be the basis for patentability when the differences would otherwise be obvious. See *Ex parte Obiaya*, 227 USPQ 58, 60 (Bd. Pat. App. & Inter. 1985).

Applicant argues that the combination of JP '874 and Reisser et al would destroy the intended function of each reference. Applicant is reminded that the test for obviousness is not whether the features of a secondary reference may be bodily incorporated into the structure of the primary reference; nor is it that the claimed invention must be expressly suggested in any one or all of the references. Rather, the test is what the combined teachings of the references would have suggested to those of ordinary skill in the art. See *In re Keller*, 642 F.2d 413, 208 USPQ 871 (CCPA 1981). Here, Reisser et al was used to show the obviousness of using a metal particle instead of the non-metal particle of JP '874. There would be no destruction of the intended function of JP '874 by substituting the metal particle of Reisser et al for the non-metal particle of JP '874 since the metal particle of JP '874 (modified) would have an outer coating of polyamine or modified polyamine.

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Art Unit: 1732

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Tanck (USPN 3806458) teaches a developer mixture having acrylic coated metal particles.
